FijiCare launches IT system

By ROPATE VALEMEI
Wednesday, May 22, 2013

Update: 2:49PM FIJICARE Insurance (FIL) launched its state-of-the-art information technology system today in Suva.

FIL board chairman Phillip Thomas says the new software will identify patients via their FNPF number.

Mr Thomas said all treatment and medical findings would be recorded where they would receive automatically generated reports and be freed from the need to keep manual records.

The system was created by E-Meditek Technologies - the leading Indian medical claims third party administrator.
